

Building up moments.

MASTERTENT®

Test Cabin for Indoor & Outdoor Use

Preventive measures for
a safe everyday life.

Test Cabin for Indoor Use

A small revolution in the enduring Corona crisis.

The protective tent can be set up in a few minutes and without any special licences in front of hospitals, company entrances, shopping centres, at railway stations or airports. Thus, all employees and visitors can be checked quickly for elevated body-temperature before entering a building.

Thanks to the transparent protective wall with integrated protective sleeves, fever measurements can be taken without actually leaving the tent. The person performing the tests is required to wear disposable gloves and a certified medical protective mask FFP2 or FFP3.

Protective Sleeves

Testing without a protective suit.

Thanks to the transparent protective wall with integrated protective sleeves, fever measurements can be taken without actually leaving the tent.

Test Cabin for Outdoor Use

A small revolution in the enduring Corona crisis.

To protect your employees and customers and to prevent unnoticed infected employees or hotel guests from entering the building, it is recommended to check all persons for an increased body temperature before stepping into the building.

Thanks to the transparent protective wall with integrated protective sleeves, fever can be measured in the persons to be tested without having to leave the tent. The person carrying out the tests must always wear disposable gloves and a medical protective mask with FFP2 or FFP3 certification.

Areas of application:

- **Fever measurement**
- **Perform antigen test**
- **Perform Corona Test**
- **Perform antibody test**

Protective Sleeves

Testing without a protective suit.

Thanks to the transparent protective wall with integrated protective sleeves, fever measurements can be taken without actually leaving the tent.

Safe. Efficient. Innovative.

Our contribution to optimal prevention against COVID-19.

Easy-Up

There's no faster way!

The set-up is easy and fast. No tools are needed. Thus, a Mastertent gazebo is ready for action in a few seconds.

Waterproof

We won't leave you standing in the rain!

Regular waterproofing tests carried out on our tent fabrics testify to this.

Manufacturer

In-house production.

All of our canopy tents are built inhouse by Mastertent. High-quality, custommade solutions that are quickly produced and delivered.
