Dealing safely with COVID-19 at the Workplace.

Particularly in these crisis-ridden times, enterprises bear a great responsibility towards their employees. You are wondering how you can protect your employees and the entire organisation?

We have developed several new solutions on how to preventively establish a safe work setting for you and your employees.

Test Cabin for Indoor Use

A small revolution in the enduring Corona crisis.

The protective tent can be set up in a few minutes and without any special licences in front of company entrances, shopping centres, at railway stations or airports. Thus, all employees and visitors can be checked quickly for elevated body-temperature before entering a building.

Thanks to the transparent protective wall with integrated protective sleeves, fever measurements can be taken without actually leaving the tent. The person performing the tests is required to wear disposable gloves and a certified medical protective mask FFP2 or FFP3.

Protective Sleeves

Testing without a protective suit. Thanks to the transparent protective wall with integrated protective sleeves, fever measurements can be taken without actually leaving the tent.

Test Cabin for Outdoor Use

A small revolution in the enduring Corona crisis.

To protect your employees and customers as an employer and to prevent unnoticed infected employees or hotel guests from entering the building, it is recommended to check all persons for an increased body temperature before stepping into the building.

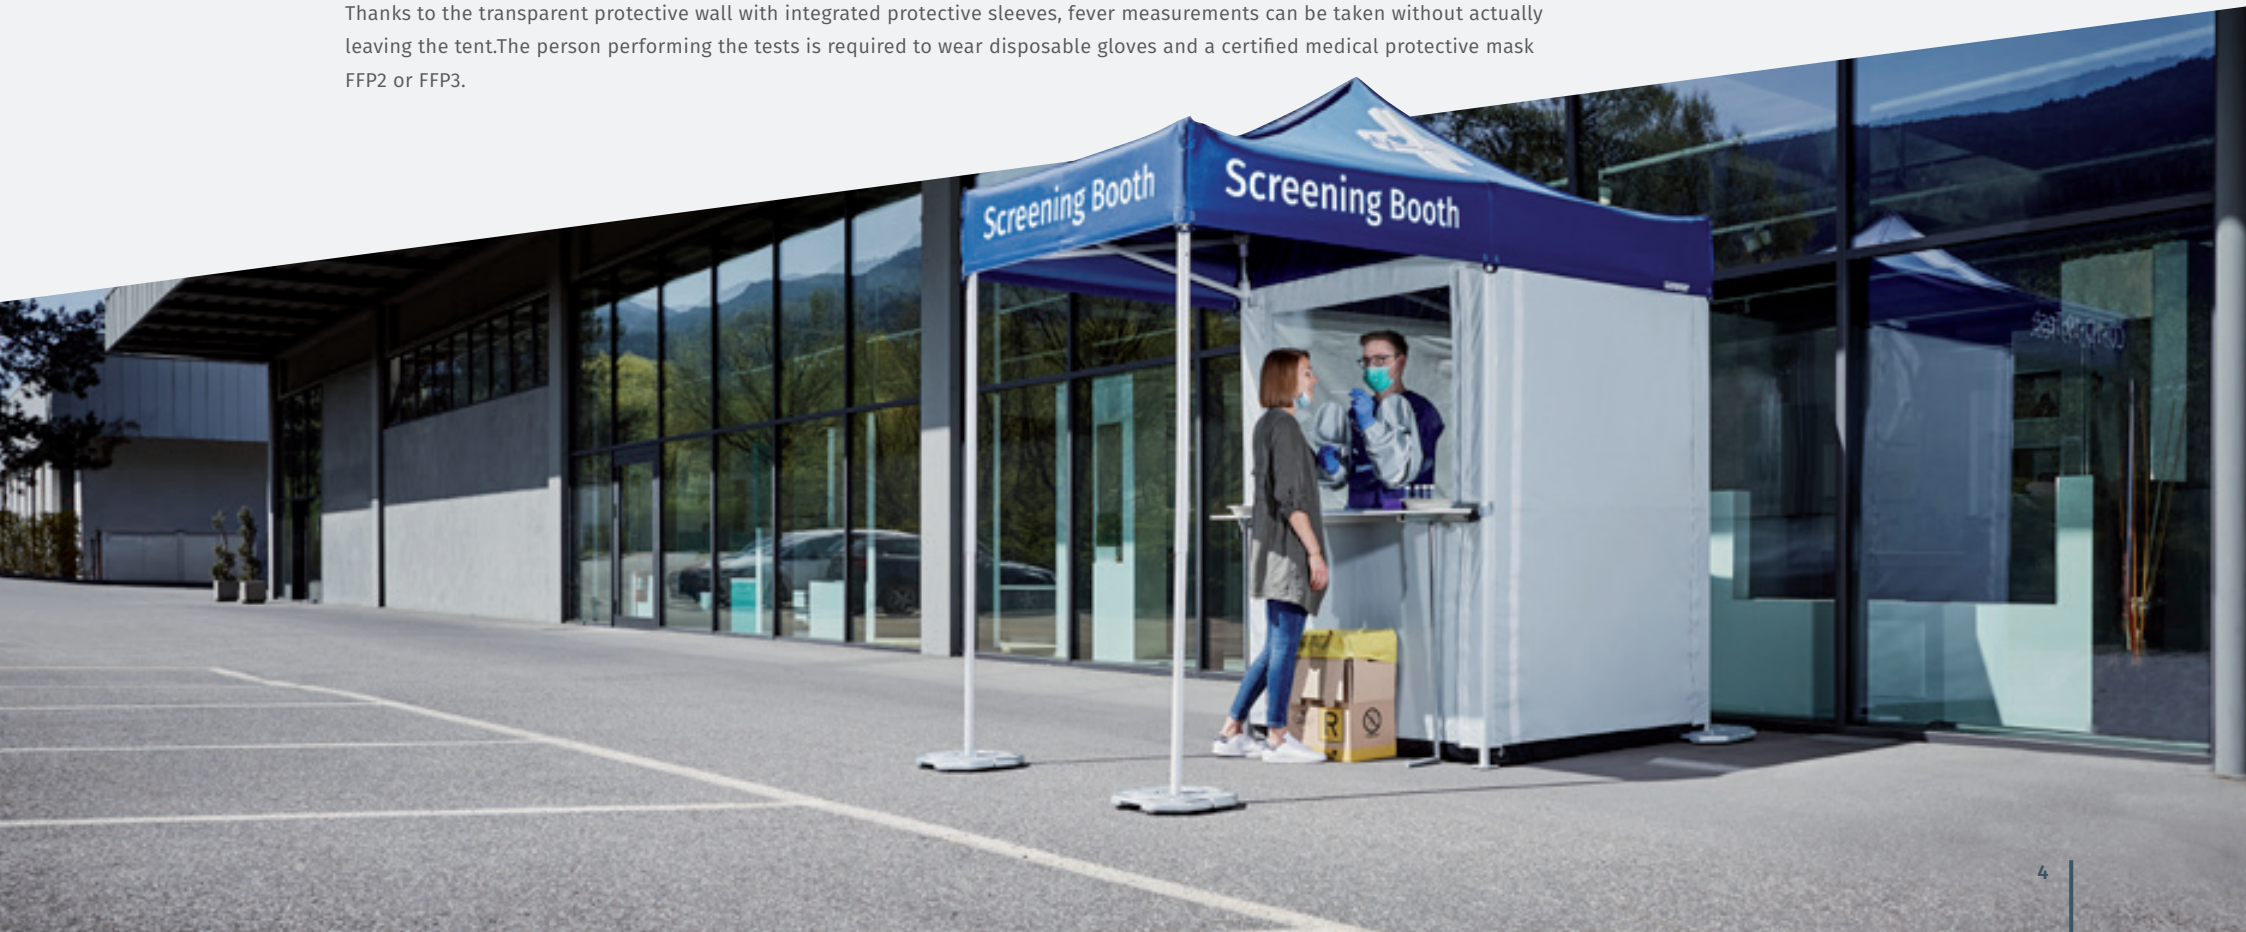

The protective tent can be set up in a few minutes and without any special licences in front of company entrances, shopping centres, at railway stations or airports. Thus, all employees and visitors can be checked quickly for elevated body-temperature before entering a building.

Thanks to the transparent protective wall with integrated protective sleeves, fever measurements can be taken without actually leaving the tent. The person performing the tests is required to wear disposable gloves and a certified medical protective mask FFP2 or FFP3.

Test Cabin for Indoor & Outdoor Use

Complete solution:

- Available in the sizes 1,5x1,5 m and 3x1,5 m with flat or pointed roof.
- Closed test cabin, with integrated roll-up door that opens with zippers, additionally equipped with a fly net for improved air circulation.
- Integrated front window made of transparent PVC with incorporated protective sleeves.
- 2 side walls for the access area outside (for the size 3x1,5m).
- Counter as storage possibility for various objects.
- Included tent floor attached to the side walls.

Optional:

- Base plates for outdoor use.

Sizes:

3x1,5

1,5x1,5

Other sizes available upon request.

Disinfection Tunnel

Open-air spray shower for head-to-toe disinfection.

To additionally decrease the risk of infection, so-called disinfection tunnels can be installed at the entrance area of your hotel, supermarket or company building.

Our gazebo in the special size 1,5x4,5 m with integrated dormer is hereby used to create a protected space outdoors, where people can be disinfected from head to toe.

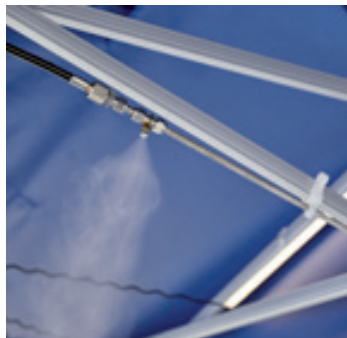

A nozzle system is integrated into the tent legs, whereby the disinfectant is dispersed into a fine mist of water, which ultimately covers all kinds of surfaces such as clothing, shoes, bags, etc. This way all persons can be disinfected before entering the building from head to toe. Thereby, any bacteria sticking to clothing, shoes or bags, which might get into the hospital unnoticed even in case of negative Corona tests, can be eliminated reliably.

The disinfectant is automatically added to the water by the dosage pump and kills viruses, bacteria and fungi quickly and easily while being harmless to people and the environment.

Disinfection Tunnel

Complete solution:

- Aluminium frame 1,5x4,5 m with 8 legs and an entrance height of 2,20 m.
- Roof 1,5x4,5 m with 4 dormers (in the middle of each side).
- 2 closed sidewalls 4,5 m.
- 8 Base plates.
- 1 pc. LED-lighting.
- Spraying plant (4 spray archs, 1 pump, tank for disinfection liquid).
- External pump station with
 - Switch cabinet with light barrier and time relay
 - High-pressure pump (70bar), water flow 0,5 l/m
 - Automatic dosage pump
 - Holder for a 5l disinfectant canister
 - Water filter

Optional:

- Floor 1,5x4,5 m available.
- Tent fabrics can be fully printed or customised with your logo.

Size:

1,5x4,5

Other sizes available upon request.

Goods Receiving Station

For maximum safety for all warehouse workers and logistics agents.

Since the outbreak of the lung disease, freight carriers have not had an easy job. Restaurants at service stations are closed and when unloading goods at their final destination the respective enterprise can usually not be entered.

With our mobile goods receiving station, we enable contactless and secure exchange between freight carrier and employee. The delivery notes can be conveniently signed on the counter and received by the warehouse employee through a closed wall.

Warehouse staff and drivers are thus protected against infection. Goods can be received safely.

Secure Receipt of

Goods

The signing of shipping documents takes place securely at the counter. The documents can be handed over contact-free to the warehouse worker through the tiny opening in the window front.

Goods Receiving Station

Complete solution:

- Aluminium frame 3x1,5 m with 6 legs.
- Tent fabric available in 12 colours.
- Sidewall 6m with window with integrated slot for document handover.
- Counter 1,5m.

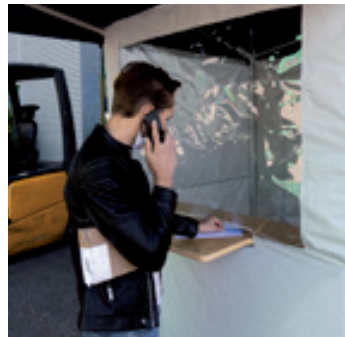

Optional:

- Base plates for outdoor use.
- Sidewalls for the outdoor access area.

Size:

3x1,5

Further sizes are available on request.

Pick-up service for retailers

Outdoor space solution extends protection for employees & customers.

Retailers are increasingly focusing on digital or phone ordering services.

However, delivery options are rarely available, thus goods are picked up in the shops by the customers themselves.

Since there is usually not enough space on-site for such a collection service, more and more retail shops are choosing outdoor space solutions. Thanks to the flexible combination possibilities of our gazebos, we can offer an appropriate solution for every spatial situation

Raising
visibility

Print your gazebo with your logo or the intended use. Thus you are easily visible for your customers!

Pick-up service for retailers

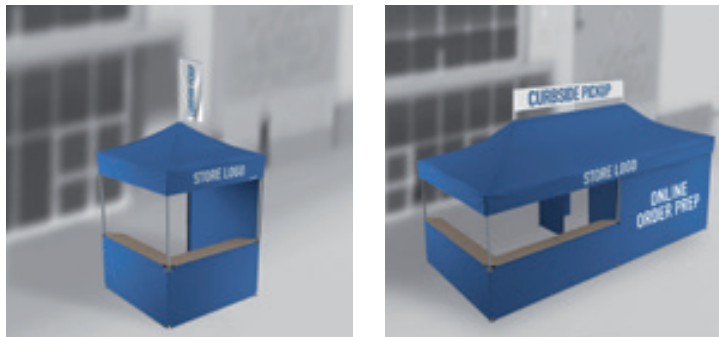

Configuration options:

- Aluminium frame in 9 standard colours.
- Tent fabric available in 12 colours.
- Various sidewall styles.

Optional:

- Custom printing of all tent fabrics possible.
- Printable banners and flags available.
- Base plates for outdoor use.
- Kit of stakes and tension straps.

Sizes:

8x4	6x4	6x3	5x5	4,5x3
4x4	4x2	3x3	3x2	3x1,5
2x2	1,5x1,5			

Mobile Visitor Center

Safe and shielded - Visits to retirement homes can finally be allowed again.

For several weeks, residents of retirement homes have not been allowed to receive any visitors due to the COVID-19 pandemic. Therefore, as a tent-manufacturer, we have developed a solution that makes visits to old people's homes possible again. For not giving the virus any chance, a mobile visitor centre can be set up in just a few minutes in front of the old people's home.

Thereby a gazebo 4x2 m with a central, transparent protective wall is set up. The partition wall divides the tent into two sections and thus allows the safe and contactless meeting between visitors and residents. The persons must always wear a medical protective mask.

Transparent
protective wall

Visual contact between visitor and home resident thanks to a transparent PVC protective wall.

Mobile Visitor Center

Complete solution:

- Aluminium frame 4x2 m.
- Tent fabric available in 12 colours.
- Sidewall 6m with panoramic window.
- 2 closed side walls 2m.

Optional:

- Floor 4x2 m or 2x2 m available.
- Custom printing of all tent fabrics possible.
- Base plates for outdoor use.
- Kit of stakes and tension straps.

Size:

4x2

Further sizes are available on request.

Mobile Partition Walls

Protective elements for a higher sense of security of your guests.

To protect your guests as well as your employees we recommend installing mobile partition systems in your restaurant or bar area.

The mobile partition consists of two aluminium poles and a fabric panel, which is fixed to the poles and thus provides the necessary protection between two tables. The mobile partition walls can be modularly extended. The arrangement of the partitions can thus be flexibly organised according to your room conditions. Corner or niche solutions and connected partitions are possible.

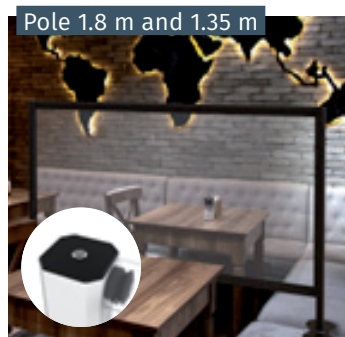

The colour of the poles can be chosen from our 3 standard colours black, ecru and white whilst the fabric panel can be printed individually. Alternatively, the fabric panel can also be replaced by transparent PVC. Thus the protective separation system can be individually adapted to your ambience.

Protection and design element at the same time. You are a beverage manufacturer? Use the partition walls for your advertising!

Mobile Partition Walls

Aluminium poles

- Available in black, ecru and white.
- Including foot plate in black (iron plate 5 mm).
- **Pole 1.8 m or 1.5 m**
 - Suitable for use as a freestanding partition wall.
- **Pole Modular 1.8 m or 1.5 m**
 - Suitable for connecting several partition walls.
- **Pole 1.35 m or 1.05 m**
 - Suitable for table groups with bench.

Fabric panel:

- Dimensions: 1.73x1.27 m or 1.73x0.9 m.
- **Transparent**
 - With large, almost frameless PVC protective window.
 - Tunnel and border in black.
- **Monochrome**
 - Available in 12 colours.
 - Tunnel and border tone on tone.
- **Personalized**
 - Fully customizable.
 - Printable on both sides.

Individual dimensions can also be produced on request.

Reusable fabric masks

Fabric masks from our own production, to reduce infection rates.

As a European tent-manufacturer, we have developed, besides numerous new tent solutions, our own reusable fabric masks, which are now produced in our in-house sewing department.

Thanks to different fabric colours and sizes for children and adults, we can offer the right model for everyone. Thus, you do not have to be concerned about the slipping of the fabric mask or a restricted visual field.

The fabric masks are made of 100% cotton and have an elastic strap to allow easy attaching behind the ears. High wearing comfort is guaranteed!

No medical use

They are not FFP2 or FFP3 certified and therefore not suitable for medical or surgical use.

Reusable fabric masks

Product features:

- 100% cotton.
- Only ecologically compatible textiles with the eco-label "Standard 100 by OEKO-TEX®".
- Washable at 60 degrees and reusable.
- Double-ply stitched.
- Attached behind the ears with elastic.
- Not FFP2 / FFP3 certified, therefore not suitable for medical or surgical use.
- Package size: 10 pieces.

Optional:

- Multi-coloured embroidery according to individual wishes are possible.

Sizes:

- **Adults** (Colour: white)
- **Children** (Colours: pink, light blue)

Individual models can be produced upon request.

Safe. Efficient. Innovative.

Our contribution to optimal prevention against COVID-19.

Easy-Up

There's no faster way!

The set-up is easy and fast. No tools are needed. Thus, a Mastertent gazebo is ready for action in a few seconds.

Waterproof

We won't leave you standing in the rain!

Regular waterproofing tests carried out on our tent fabrics testify to this.

Manufacturer

In-house production.

All of our canopy tents are built inhouse by Mastertent. High-quality, custommade solutions that are quickly produced and delivered.
